

Technical data sheet

F7200VIC

Butterfly Valve with Grooved types

- Disc electroless nickel coated ductile iron
- Bubble tight shut-off
- Resilient seat
- Valve face-to-face dimensions comply with AWWA (c606) & MSS-SP-67

• Completely assembled and tested, ready for installation

• VIC-300 Masterseal is manufactured by the Victaulic Company.

Type overview

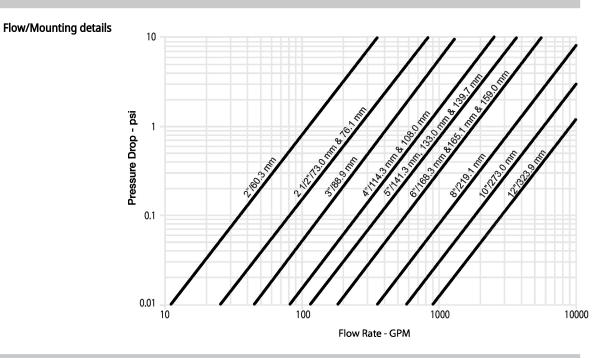

Туре	DN
F7200VIC	200

Technical data

Functional data	Valve size [mm]	8" [200]
	Fluid	chilled or hot water, up to 60% glycol
	Fluid Temp Range (water)	-30120°C [-22250°F]
	Body Pressure Rating	ANSI Class Grooved AWWA, 300 psi
	Close-off pressure ∆ps	200 psi
	Flow characteristic	modified linear
	Leakage rate	0%
	Pipe connection	Grooved
		ANSI/AWWA (c606)
	Servicing	maintenance-free
	Flow Pattern	3-way Mixing/Diverting
	Controllable flow range	90° rotation
	Cv	3400
	Maximum Velocity	20 FPS
Materials	Valve body	Ductile cast iron ASTM A536
	Body finish	black alkyd enamel
	Stem	416 stainless steel
	Stem seal	fiberglass with TFE lining
	Seat	EPDM
	Disc	electroless nickel coated ductile iron
Suitable actuators	Non Fail-Safe	SY4

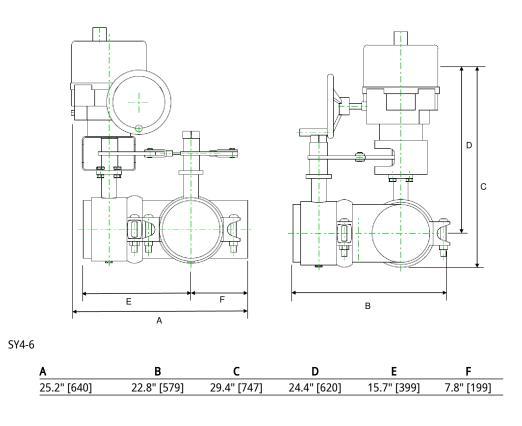

Product features

Dimensions

Technical data sheet

SY4-110

Product features			
	Application	SY Series actuators are fractional horsepower devices, and utilize full-wave power supplies. Observe wire sizing and transformer sizing requirements. Proportional models CANNOT be connected to Belimo direct coupled (AF, AM, GMetc) actuator power supplies or any type of half-wave device. You MUST use a separate, dedicated transformer or power supply to pow the SY actuator. Please do not connect other automation equipment to the dedicated SY supply source. You MUST use four wires (plus a ground) to control a proportional control SY actuator (See SY Wiring Section).	
Accessories			
	Electrical accessories	Description	Туре
		Local electric disconnect for SY412 series actuator, AC 120 V, on/off Battery backup system for SY46 series actuator, AC 120 V, on/off Battery backup system for SY46 series actuator, AC 120 V, MFT Battery backup system for SY45 series actuator, AC 24 V, on/off Battery backup system for SY45 series actuator, AC 24 V, MFT	HOA-120V EXT-NSV-B03-120 EXT-NSV-B04-120 EXT-NSV-B13-24 EXT-NSV-B14-24
Electrical installation			
		Do not change sensitivity or dip switch setting with power applied. Power supply Common/Neutral and Control Signal "-"wiring to a common is prohibited. Terminals 4 and 6 need to be wired separately. Isolation relays must be used in parallel connection of multiple actuators using a common control signal inputs. The relays should be DPDT. Isolation relays are required in parallel applications. The reason parallel applications need isolation relays is that the motor uses two sets of windings, one for each direction. When o energized to turn the actuator in a specific direction a voltage is generated in the other due the magnetic field created from the first. It's called back EMF. This is not an issue with one actuator because the voltage generated in the second winding isn't connected to anything there is no flow. On parallel applications without isolation, this EMF voltage energizes the winding it is connected to on the other actuators in the system, the actuators are tying to tu in both directions at once. The EMF voltage is always less than the supply voltage due to th resistance of the windings, so while the actuator still turns in the commanded direction, the drag from the other reduces the torque output and causes overheating. Warning! Live electrical components! During installation, testing, servicing and troubleshooting of this product, it may be necess to work with live electrical components. Have a qualified licensed electrician or other indivi who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical component could result in death or serious injury.
